

**Commercial Graphics**

# Signplates & Commercial Graphics

Signature is one of the market leaders in sign plate manufacture within the UK with capacity to produce in excess of 600 metres per week. Using exclusively 3M material offering from 7 to 12 years reflective guarantee, dependant upon the grade specified by the customer, Signature provides the quality and long-term product guarantees you would expect from a nation wide organisation.

Our Commercial graphics department are able to offer additional products which are customised to meet customer requirements. From small signs, labels, vehicle livery, banners, site boards, window stickers and general signage through to more complex designs using state of the art CAD and vinyl cutting facilities.

## Remote Light Source

Although primarily designed for use on our UK highways, the internally illuminated traffic sign system lends itself to other applications where large illuminated signage is required by offering low maintenance and overall cost savings. Illumination is by means of light passing through a transportation tube from its housing into the side of the signbox. This method replaces the old method of fluorescent tubing and still offers illumination in the event of power failure. During the day-time the sharp contrast between the colours makes the legend stand out, and at night as well as allowing light to pass through, it also reflects external lights, bouncing the beam back to the source and reinforcing the legibility of the sign.

**Body:** Fabricated Sheet Aluminium - Fully welded to provide excellent ingress protection

**Finish:** Polyester Powder Coated - Grey as standard - other colours available

**Fascia:** Diamond Grade material - 12-year graphic guarantee

**Illuminated:** 2 x 400W Lamps (dependant on sign size) - offering 20,000 hours lamp life
